

OSPRY vs Warmly

Warmly is a mid-market AI go-to-market platform: visitor de-anonymization bundled with retargeting, live chat, and orchestration, sold annual-contract-first. OSPRY is the same identify-enrich-route loop, a-la-carte, self-serve, and monthly. The honest difference is the buying model as much as the feature list.

	OSPRY	Warmly
Entry price	\$100/mo, monthly, self-serve	~\$833/mo, annual contract first
Trial	\$1 for 30 days of everything	Free tier capped around 500 visitors
Identification	Two providers on one record	Single feed
First-party intent	Owned: scroll, video, exit, velocity rules	Partial
Consent platform	Bundled free, every plan	Not bundled
AI per-visitor brief	Yes, with 0-100 ICP fit	Limited
Retargeting / ad audiences	Coming soon, a-la-carte add-on	Live now, bundled in tier
White-label reselling	Yes (Agency plan)	No

Where Warmly wins today, said plainly

Warmly's live chat and instant meeting booking are more mature than anything OSPRY ships today, and its retargeting is live now while ours is coming soon. If those two capabilities are the center of your motion and the budget fits, Warmly is a real product.

How to choose

- **Pick Warmly if:** you want bundled retargeting plus live chat today, in one annual contract, and ~\$10K a year is inside budget.
- **Pick OSPRY if:** you want the identification, intent, and AI layer a-la-carte for a fraction of the price, with consent bundled, no annual lock, and a reseller path if you are an agency.

The bottom line

Warmly bundles everything at one big price. OSPRY lets you buy exactly the loop that recovers your anonymous traffic, starting at \$1, and add the rest as it ships. Under their floor, with pieces they do not bundle at any tier.

Try it on your own traffic: start free with the consent platform, or take the \$1 trial (30 days, \$10 in credits at reduced rates) at ospri.ai. Every price above is checkable on the vendor's own pricing page; we link to them on ospri.ai/compare.
